

This requirement would pose an undue hardship on this LPFM radio station. WMCC-LP is a small station barely able to keep up with it's equipment loan expenses. Recording 14 hours daily would require timing and computer equipment, DVD recorder, and a person to change DVD discs at least every three days. The estimated equipment cost is \$800 or more. We have no person available at the specified times... (before 6AM or after 10PM)to change the DVD disc. I am also concerned about the copyright issues with the music we play. Presently we have special low cost copyright contracts to cover our programming. I do not believe they would like us to make and hold recordings for 60-90 days without higher charges. Our programming is religious, health, and social training; it never includes indecent material. Docket # 04-232 represents an undue hardship on small stations such as WMCC-LP Herb.
